75"	30 - 40 hp.	1,587 lbs.
90"	35 - 50 hp.	1,753 lbs.

AERWAY TURF FEATURES & OPTIONS

The cost-effective, low-maintenance, and durable turf solution of the AERWAY Turf provides you with Salford dependability with its long-lasting options.

SHATTERTINES®

Low-cost, long-lasting, and low-maintenance. Fractures tough soil, enhances air, water, and nutrient movement. Promotes stronger root systems and healthier top growth.

SPORTSTINES®

Relieve surface compaction and penetrate up to 6 inches on greens, tees, approaches, and fine turf. Add the "Greens Express" smoothing roller, available on most AerWay frames, to aerate up to 18 greens in just three hours.

FINETINES®

Low-cost, long-lasting, and low-maintenance. Fractures tough soil, enhances air, water, and nutrient movement. Promotes stronger root systems and healthier top growth.

CORINGTINES®

3/4" diameter and 4" length. Ideal for dethatching, topdressing, and over-seeding preparation on fairways and sports fields. It can be used at high speeds and is available in 4", 5", and 6" centers on a variety of AerWay frames.

Adjustable Rollers

On certain AerWay® models, the user has the ability to offset the rollers of the Shattertine® equipped units for renovation purposes. This can be accomplished by changing two bolts on the outboard end of each roller. The manual unit has three positions of offset, 0, 2 1/2 and 5 degrees.

Greens Express Smoothing Roller

The AerWay® Greens Express smoothing roller option allows the operator to lift the roller completely off the ground to leave the aeration holes open, or adjust tine penetration in less than one inch increments, or support the tined roller completely out of the ground for use exclusively as a smoothing roller.

Liquid Ballast Tank

Tank Length	Total Ballast
47"	650 lbs.
62"	860 lbs.
77"	1,040 lbs.
92"	1,250 lbs.
